

A little wild. A lot delicious.

Tahi
At one with nature.

Found in our forest honey...

MANUKA

Found in all of our forest honey, Manuka is revered for its unique medicinal qualities. Rich and golden in colour, smooth and creamy in texture, distinctively sweet yet mild in flavor.

KANUKA

Known for its healing properties, Kanuka honey is lighter in colour than Manuka, but with a similar intense flavor, crisp, aromatic, 'butterscotch taste' and deliciously pure finish.

REWAREWA

Dark, intense and rich with a delightful, smooth, runny, malty flavour. Used as a traditional remedy for healing sore throats and other internal disorders.

POHUTUKAWA

Found in our forest honey in the summer months. Pale and golden in colour, this much-loved honey is well-balanced, lightly floral, sweet and earthy.

Teller's Point, Tahi

Tahi Forest Honey has a unique taste all of its own, thanks to our wildly remote New Zealand location, warm, sub-tropical climate, and our relentless determination to protect our environment. Our honey is free from GMOs and GE, with no added sugar or water and (absolutely, passionately), no chemicals. It's 100% natural ... just as nature intended.
